BURAK FİLİZ

FULL STACK DEVELOPER

I am Burak, a junior full stack developer passionate about software development. I know many different technologies such as Java, C#, CSS, Bootstrap, .NET Core, Angular and React.

I am experienced in web and desktop application development and I have developed projects in Java and C# languages for backend development. I am also experienced in front-end development with technologies such as CSS, Bootstrap and Angular. I've also worked with other technologies, React and .NET Core.

I have knowledge of software development processes and use my analytical thinking and problem solving skills to develop custom software solutions for customer needs. Also, I am a team player and always have an open mind to learn new technologies.
